environment: Kutikai guarantees eco-friendly manufacturing process and safety of all materials used to manufacture this product.

Bed size is adapted to standard size mattresses.

KUTIKAI

FUNCTION

The transition from crib to toddler bed is a very important moment in child's development. A larger bed gives freedom and independence. The mattress is placed low, allowing the child to easily get in or out of the bed. The bed has been designed as a house with openings. This is not only essentially a bed but it inspires to play various games during the day. It can be a shelter, a stand, or a library. There's a shelf on the other side to put a favourite soft toy or something to drink. Children like to hide, and the shape of the house with limited walls helps provide a sense of security in a larger room. The length of the mattress is comfortable for children that like to move freely while sleeping.

DESIGN

The Roof Collection designed by Kutikai brings out the exceptional nature of plywood. It comes across the needs of a modern parent and truly makes children smile. The rungs are unevenly arranged with varying width, the narrowest fits perfectly into the baby's small hands making it easier to stand up. Simple, safe, and practical, with a robust design, manufactured in a family carpenter shop in the south of Poland - all under strict designers' supervision.
