enviroment: Kutikai guarantees eco-friendly manufacturing process and safety of all materials used to manufacture this product.

Bed size is adapted to standard size mattresses.

KUTIKAI

FUNCTION

The 167x84 toddler bed has been designed especially for children who are happy to have their own „real grown-up’s bed”. Its plain form is a reference to a full-size twin bed for adults with a typically higher headboard and lower footboard. The holes on the side are the distinctive element of this collection. They are not only intriguing for children but can also uncover the bed sheet whose interesting colour will surely go well with the delicate tones of the collection. The rail protects our lively babies against falling out of bed (especially during the night) and is an integral part of the set. It is easy to assemble.

DESIGN

The Peekaboo Collection designed by Kutikai is simple in form and has one distinctive feature - a hole which attracts children with its familiar shape and makes them want to explore what’s on the other side or - play peekaboo.

Simple, safe, and practical, with a robust design, manufactured in a family carpenter shop in the south of Poland under strict designers’ supervision.

The collection also stands out for its legs covered with natural veneer - modified oak which make it exceptionally light.
